MOVABLE POOL FLOORS

AMI TIME

A pool that suits
all your clients'
needs.

Same place
Same day
15 minutes later

TRANSFORM YOUR SPACE AT THE TOUCH OF A BUTTON.

With **AKVO SPIRALIFT**, you don't have to choose between a pool and a lounge bar: you can have both, and in the same space. Thanks to a movable floor that lifts and lowers with ease, in just 15 minutes your pool transforms itself to suit the needs and activities of your clients. Imagine a shallow pool for young swimmers at 4 pm, a full-sized pool at 6 pm, a bar at 8 pm and a dance floor at 10 pm... giving your space a full range of entertainment choices.

A NEW GENERATION OF MULTIFUNCTIONAL POOLS

The pool of the future is more than just a pool; it's a water feature that appears and disappears in mere minutes, right in front of amazed users' eyes. It's a pool whose depth can be adjusted to ensure the safety of younger swimmers. It's a retractable patio, ready to be outfitted with sofas, tables or yoga mats. It's an eco-friendly solution that reduces evaporation during the day and minimizes heat loss at night. Delivering the ultimate in flexibility, **AKVO SPIRALIFT** will perfectly complement your hotel or residential complex.

MAKE THE MOST OF YOUR SURFACE AREA

Installing a variable-depth pool in a condo complex meets the changing needs of residents and broadens the base of potential buyers. In hotels, it maximizes profits through the addition of lucrative new uses, such as a snack bar, lounge space, restaurant or night club. Multiply your return on investment by doubling the possibilities without doubling floor space.

CUTTING-EDGE TECHNOLOGY AND CUSTOM DESIGN: THE BEST OF BOTH WORLDS

Our innovative movable pool floors are complemented by a silent, invisible and space-saving mechanism. No need for a separate control room or an additional waterproof recess for the motor: everything happens under the water, beneath the floor of the pool. The system can be adapted for any environment, respects the existing architectural integrity of your space, and adds an elegant touch.

For any exterior
or interior pool;

For pools of all shapes and sizes,
with or without in-pool stairs;

For any depth of pool;

For any style:
allows a wide selection of retractable
patio finishes to complement
any decor.

BEHIND THE SCENES

Beneath an AKVO movable pool floor there is a technology that has been trusted in the scenic, aerospace and automotive industries for over 25 years: the Spiralift™. Compact yet powerful, this stainless steel lifting system is used by car manufacturers like Ferrari, General Motors, Renault and Kia, and found in prestigious venues such as the Paris Philharmonic, London's Royal Opera House, and New York's Carnegie Hall, as well as in flight simulators around the world.

Canadian Paco Group developed and patented the Spiralift system. Today, the group has delivered some 2000 projects in 65 countries through its subsidiaries Paco Spiralift (industrial applications), Gala Systems (scenic equipments and multipurpose halls) and AKVO SPIRALIFT (movable pool floor systems).
