

**Emerging Design Trend
in the Hospitality Industry:**

THE DISAPPEARING POOL

The **AKVO Spiralift Movable Pool Floor** lets your hotel reclaim the surface area of your pool when not in use. This fully customizable and seamless system uses a series of compact lifts to raise and lower the entire pool floor automatically. And the transformation process only takes about 10 minutes at the push of a button!

Imagine a shallow pool at 1 pm, a full-depth pool at 4 pm, a banquet at 6 pm and a dance floor at 10 pm... complete flexibility to suit the needs and activities of your hotel guests.

Vancouver, BC

In the last year, AKVO Spiralift provided the new Dream Hotel rooftop and other prestigious hotels with a movable floor to reconfigure their terrace pool.

The Dream Hotel Hollywood, Los Angeles, USA

Rooftop terrace pool

- **Area:** 488 ft² (45.5m²)
- **Usable water depth:** 4 ft (1.2m)
- **Capacity:** 100 lb/ft² (500kg/m²)
- **Type:** Skimmer
- **Finish:** Porcelaine tiles
- **Stairs:** Full width

BENEFITS

- **Water depth on demand** – allows for different aquatic activities
- **Space-saving** – doubles space with the same surface area
- **Superior design** – provides a rigid retractable patio with hidden drive mechanisms
- **Eco-friendly solution** – minimizes evaporation during the day and heat loss at night
- **Minimal handling** – needs only a single operator holding down a button
- **Low maintenance** – protects from harsh weather and reduces cleaning time
- **Large load capacity** – meets all commercial load requirement standards

The **AKVO patented Spiralift® technology** has proven its efficiency for over 30 years in numerous engineer projects and since 2012 in the transformable pool industry in United Kingdom, France, Switzerland, Russia, Hong Kong, Qatar, Jordan, Mexico, Canada and the United States.
